LEGENDA DELLE ABBREVIAZIONI E TERMINOLOGIE

BRONZO: Il termine bronzo, riportato all'interno del presente catalogo, può essere utilizzato per:

- individuare il solo aspetto superficiale di un prodotto
- indicare una lega di rame-stagno con una percentuale di rame non inferiore dell'85% e aggiunta di altri elementi (per i prodotti eseguiti con la fusione a cera persa).
- indicare una lega di rame-zinco con una percentuale di rame non inferiore al 65% e aggiunta di altri elementi (per i prodotti eseguiti con la fusione in terra e Pressofusione), con aspetto superficiale tipo bronzo.

Tutti i prodotti illustrati, dotati di fiamma caratteristica di vetro, che sono predisposti per contenere lampadine per l'illuminazione e che saranno collegati ad un impianto elettrico, possono essere destinati all'uso, solo se verranno applicate tensioni nominali inferiori ai 50 Volt in corrente alternata e ai 75 Volt in corrente continua. Restano comunque a carico dell'installatore tutti gli obblighi dettati dalla Legislazione vigente nel momento in cui tali prodotti verranno inseriti in un impianto elettrico. È fatto divieto di impiegare i prodotti del presente catalogo in ambiente con pericolo/rischio di esplosione.

In tutti i portalampe è vietato introdurre il cero. Il cero è applicabile solo sui modelli prestabiliti; in talune condizioni/modelli, il cero potrebbe surriscaldare la superficie esterna della "lampada cero".

KEY TO ABBREVIATIONS AND TERMINOLOGIES

BRONZE: The word bronze, that is written inside this catalogue, can be used:

- to indicate the surface of a product
- to indicate an alloy of copper-tin with a percentage of copper not lower than 85% and the adding of other elements (for products made with lost-wax casting)
- to indicate an alloy of copper-zinc with a percentage of copper not lower than 65% and the adding of other elements (for products made with the ground casting and Die-casting) with a bronze type surface.

All the illustrated products, equipped with characteristic glass flame, that are arranged to contain lamps and to be connected to an electric plant, can be used like this, only when voltages lower than 50 Volt in alternate current and than 75 Volt in direct current are applied. The installer has the responsibility to meet all the law requirements in force at the moment in which these products are inserted in an electric plant. Using the products of this catalogue in a place with danger of explosion is not allowed.

Όλα τα απεικονιζόμενα προϊόντα, που διαθέτουν χαρακτηριστική υαλώδη λάμψη, που προορίζονται για να δεχτούν λυχνίες για το φωτισμό και που θα συνδεθούν σε μια ηλεκτρική εγκατάσταση, μπορεί να προορίζονται για χρήση, μόνο αν εφαρμοστούν ονομαστικές τάσεις μικρότερες των 50 Volt εναλλασσόμενου ρεύματος και 75 Volt συνεχούς ρεύματος. Ωστόσο αποτελεί υποχρέωση του τεχνικού εγκατάστασης όλα όσα ορίζονται από την ισχύουσα Νομοθεσία κατά τη στιγμή που τα προϊόντα αυτά θα εισαχθούν σε μια ηλεκτρική εγκατάσταση. Gli oggetti prodotti, con finitura a coperta lucida, sono interamente foggiate e decorati a mano da maestri del porcellanato seguendo le antiche tecniche artistiche e tradizionali. Per tutti i manufatti di tale lavorazione vedi attestazione di inalterabilità riportata a pag. 500.

Visto la sua produzione interamente fatta a mano che presenta incavità e sottosquadri, si consiglia di posizionare questo tipo di prodotto all'interno in quanto in presenza di gelo si potrebbe danneggiare.

Vezzani Spa in collaboration with the master porcelain artists of CAPODIMONTE (Naples) present their collection

Flowers for ever!!!

All of the objects, which have a glazed finish, are entirely modelled and decorated by hand by master porcelain artists, using traditional artistic techniques. All handmade articles of this type have a certificate of inalterability, shown on page 500. All these entirely handmade objects feature hollows and undercuts, and it is therefore advisable to keep this type of product indoors, as excessively cold weather could damage it.
